TALENTRA — JOBS & APPLICATIONS DESIGN (B18 WORKING DRAFT)
Entity names and relationships require team approval
Draft only. Yellow entities / labels are proposals to confirm. Organisation and candidate_profile are cross-module dependencies. Every business table still needs the docket's audit fields, deletion policy, nullability justifications, data classification and constraints in the companion data dictionary. This diagram does not replace the approved entity inventory.
CROSS-MODULE DEPENDENCIES (NOT OWNED HERE)
candidate_profile
PK id
candidate identity/profile fields
organisation
Phase 2 dependency
PK id (reference contract only)
MASTER DATA — COMMON PHASE 1 LOOKUPS
employment_type
Master Data lookup
work_type
Master Data lookup
job_role
PK id
code, localized display name, active flag, sort order
skill
Master Data lookup
location
Master Data / Organisation dependency
application_status
PK id
code, localized display name, active flag, sort order
JOBS & APPLICATIONS — PHASE 1
job_application
PK id
FK candidate_profile_id
FK job_requirement_id
applied_at, current_status_id (policy TBD)
job_interview
PK id
FK job_application_id
scheduled_at, status_id
job_shortlist
PK id (confirm)
FK job_requirement_id
FK candidate_profile_id
shortlisted_at, actor dependency
job_offer
PK id
FK job_application_id
offer_status_id, salary, currency_code
application_joining
PK id (proposed)
FK job_application_id
FK job_offer_id (rule TBD)
joining_date, joining_status (proposed)
Confirm whether a separate entity is required
job_search_history
PK id
FK candidate_profile_id
searched_at, query/filter data (proposed)
job_view_history
PK id
FK candidate_profile_id
FK job_requirement_id
viewed_at
application_status_history
PK id
FK job_application_id
FK application_status_id
changed_at, changed_by, note
application_questionnaire_response
PK id (proposed)
FK job_application_id
FK questionnaire_question_id
response_value / response_text (proposed)
Entity inclusion and response format to confirm
job_requirement
PK id
FK organisation_id
FK job_role_id, employment_type_id, work_type_id, status_id
title, description, publish state, salary range
job_questionnaire
PK id
FK job_requirement_id
title, instructions, is_active
questionnaire_question
PK id
FK job_questionnaire_id
question_text, question_type (proposed)
job_skill
PK id (confirm)
FK job_requirement_id
FK skill_id
job_position
PK id
FK job_requirement_id
FK location_id (dependency)
position_title, vacancy_count
1 : 0..N
1 : 0..1 (proposed)
